

“ALL IN ONE PLACE” WITH

PROLUPUS CR-DRS RADIO RECORDER

It is optimized for your professional audio recording experience with its perfectly compact design and practical plug-and-play that does not need any external software or hardware

DISCOVER MORE OF THE FEATURES

PROLUPUS

- It helps to prevent work accidents or to identify unavoidable accident causes.
- It records without the need for PC, software or external radio terminal.
- Provides real-time remote listening and monitoring via PC, tablet and mobile phone.
- Transcribes radio conversations in real-time.
- With the keywords created by you it activates Prolupus Alarm System or existing alarm systems in a short time.
- By being integrated with the Prolupus Announcement System, it provides the opportunity to announce in larger areas.
- It creates a transcript of the conversations on a daily, weekly, or monthly basis.
- By creating a radio user record it provides user-based, channel-based, and selected time interval-based queries and reports.

At the same time;

- Recordings from DMR, TETRA, P25 radios
- Recordings from Analog / Digital radios
- Recordings in UHF / VHF bands
- Recordings in wav and mp3 format
- Simultaneous radio recording with 2, 4, and 8 channels
- Internal storage media and up to 32,000 hours of high-quality recordings

You can experience these features in the finest ways.

**WITH PROLUPUS CR-DRS,
A POWERFUL AND
UNINTERRUPTED AUDIO RECORDING
SYSTEM IS READY FOR YOU!**
